As previously agreed I have arranged for some speakers to participate in a mini-symposium titled 'Wireless Telecommunication and the Radio Spectrum'.

The speakers and their titles are:

- Andreas Eisenblätter 'Assigning Frequencies in GSM-Networks';
- Peter Cullen 'The use of integral equations in mobile radio propagation';
- Ray Bradbeer 'Application of New Techniques to Military Frequency Assignment'.

Yours sincerely

A handwritten signature in black ink, appearing to read 'R Gower', is written over the typed name.
