

Lösningsförslag till dugga 1(a) i Matematisk analys, 20121108**1 (a) falsk****(b) sann****(c) sann****(d) sann****1. (a) 0****(b) $\ln 2$** **3**

$$\begin{aligned}\int \frac{x}{\sqrt{1+x^2}} dx &= \left\{ \sqrt{1+x^2} = t, x = \sqrt{t^2-1} \Rightarrow dx = \frac{2t}{2\sqrt{t^2-1}} \right\} = \\ &= \int \frac{\sqrt{t^2-1}}{t} \cdot \frac{t}{\sqrt{t^2-1}} dt = \int dt = t + C = \sqrt{x^2+1} + C.\end{aligned}$$

Svar: $\int \frac{x}{\sqrt{1+x^2}} dx = \sqrt{x^2+1} + C.$
