

Course evaluation. Fourier Analysis, fall 2009.

The course in general

I am a student at Chalmers GU PhD student

Your overall evaluation of the course: very bad very good

How well did the course agree with information from the course catalogue, syllabus, student councilors etc? did not agree at all agreed very well

How relevant do you believe the course is to your other studies?

not at all relevant very relevant

Comments:

The course should not lead to any form of discrimination, for instance based on gender, ethnicity, age or family situation. If the course has failed in these respects, please describe how.

Comments:

Course organization

Schedule: very bad very good

Course administration (information, home page etc): very bad very good

Assuming that the total amount of scheduled time is constant, do you think that

The time for lectures should increase stay the same decrease

The time for exercise classes should increase stay the same decrease

Comments:

Literature:

Was the literature easy to follow? not at all absolutely
Was the literature relevant for the course? not at all absolutely

Comments:

Teaching:

The lectures were well connected with the course literature
not at all absolutely
The lectures made it easier to understand the course content
not at all absolutely
The lectures were well planned and easy to follow
not at all absolutely

Comments:

The exercise classes were relevant for the course
not at all absolutely
The exercise classes made it easier to understand the course contents
not at all absolutely

Comments:

Your own work

How large part of the scheduled teaching did you attend?
Lectures: Exercise classes:

Apart from the scheduled time, how much time did you work with the course each week?
Number of hours:

How demanding was the course?
too easy reasonably demanding unreasonably difficult
