LIST OF PUBLICATIONS

MATS ANDERSSON

References

[1] *Henkin-Ramirez formulas with weight factors*, Ann. Inst. Fourier **32** (1982), ???-???. (with Bo Berndtsson)
Number of citations: 148

[2] *Formulas for the L^2-minimal solutions of the $\partial\bar\partial$-equation in the unit ball of $\mathbb{C}^n$*, Math. Scand. **56** (1985), 43-69.
Number of citations: 2 ??

[3] *Solution formulas for the $\partial\bar\partial$-equation and weighted Nevanlinna classes in the polydisc*, Bull. Sc. math. **109** (1985), 35-154.
Number of citations: 14

[4] *A shortcut to weighted representation formulas for holomorphic functions*, Ark. för mat. **26** (1988), 1-12. (with Mikael Passare)
Number of citations: 9

[5] *Values in the interior of the L^2-minimal solutions of the $\partial\bar\partial$-equation in the unit ball in $\mathbb{C}^n$*, Publ. Mat. **32** (1988), 179-189 .
Number of citations: 7

[6] *The corona theorem for matrices*, Math. Z. **201** (1989), 121-130.
Number of citations: 11

[7] *L^p-estimates for the $\bar\partial$-equation in analytic polyhedra in Stein manifolds*, Proc. of Mittag-Leffler 87/88 Math. Notes 38 Princeton Univ Press (), .
Number of citations: 6??

[8] *On Varopoulos' theorem about zero sets of H^p-functions*, Bull. Sc. math. **114** (1990), 463-484. (with Hasse Carlsson)
Number of citations: 6

[9] *Complex Kergin interpolation*, J. Approximation Theory **64** (1991), 214-225. (with Mikael Passare)
Number of citations: 32

[10] *Complex Kergin interpolation and the Fantappie transform*, Math. Z. **208** (1991), 257-271. (with Mikael Passare)
Number of citations: 7

[11] *Cauchy-Fantappie-Leray formulas with local sections and the inverse Fantappie transform*, Bull. Soc. math. France **120** (1992), 113-128.
Number of citations: 9

[12] *Boundary convergence in non-nontangential and nonadmissible regions, ,* Math. Scand. **70** (1992), 293-301. (with Hasse Carlsson)
Number of citations: 10

[13] *The H^2-corona problem and $\overline{\partial}_b$ in weakly pseudoconvex domains*, Preprint (1990); final version in Trans. AMS **342** (1994), 241-255.
Number of citations: 16

[14] *Unique linearly convex support of an analytic functional*, Arkiv för mat. **31** (1993), 1-12.
Number of citations: 0

[15] *Wolff-type estimates and the H^p-corona problem in strictly pseudoconvex domains*, Arkiv för mat. **32** (1995), 255-276. with Hasse Carlsson
Number of citations: 27

[16] *On the H^p-corona problem*, Bull. Sci. math. **118** (1994), 287-306.
Number of citations: 15

[17] *Formulas for approximate solutions of the $\partial\overline{\partial}$-equation in a strictly pseudoconvex domain*, Revista Mat. Iberoamericana **11** (1995), 67-101. (with Hasse Carlsson)
Number of citations: 10

[18] *H^p-estimates of holomorphic division formulas*, Pacific J. of Math. **173** (1996), 307-335. (with Hasse Carlsson)
Number of citations: 16

[19] *A division problem for $\overline{\partial}_b$-closed forms*, J. d'Analyse Math. **68** (1996), 39-58.
Number of citations: 3

[20] *Canonical homotopy operators for the $\overline{\partial}$ complex in strictly pseudoconvex domains*, Bull. Soc. math. France **126** (1998), 245-271. (with Jörgen Boo & Joaquim Ortega-Cerdà)
Number of citations: 9

[21] *A Carleson estimate for the complex Monge-Ampere operator*, Pacific J. of Math. **184** (1998), 201-205.
Number of citations: 1

[22] *Approximate formulas for canonical homotopy operators for the $\overline{\partial}$ complex in strictly pseudoconvex domains*, Math. Scand. **87** (2000), 251–271. (with Jörgen Boo)
Number of citations: 6

[23] *Taylor's functional calculus for commuting operators with Cauchy-Fantappie-Leray formulas*, International Mathematics Research Notices **6** (1997), 247-258.
Number of citations: 15

[24] *Correction to "Taylor's functional calculus for commuting operators with Cauchy-Fantappie-Leray formulas"*, International Mathematics Research Notices **2** (1998), 123-124.
Number of citations: 4??

[25] *L^p and H^p extensions of holomorphic functions from subvarieties of analytic polyhedra*, Pacific J. math. **189** (1999), 201-210. (with Kenzo Adachi & Hong Rae Cho)
Number of citations: 10

[26] *Estimates of solutions of the H^p and the BMOA corona problem*, Math. Ann. **316** (2000), 83-102. (with Hasse Carlsson)
Number of citations: 31

[27] *A constructive proof of the composition rule for Taylor's functional calculus*, Studia Math. **142** (2000), 65-69. (with Sebastian Sandberg)
Number of citations: 4

[28] *Integral representation with weights I*, Preprint Göteborg (2000), Revised version in. Math. Ann.
Number of citations: 326 (2003)1-18 27

[29] *Q_p-spaces in strictly pseudoconvex domains*, J. d'Analyse Math. **84** (2001), 335-359. (with Hasse Carlsson)
Number of citations: 15

[30] *(Ultra)differentiable functional calculus and current extension of the resolvent mapping*, Ann. Inst. Fourier **53** (2003), 903–926.
Number of citations: 4??

[31] *Almost holomorphic extensions of ultradifferentiable functions*, J. d'Analyse Math. **89** (2003), 337–365. (with Bo Berndtsson)
Number of citations: 4

[32] *Non-holomorphic functional calculus for commuting operators with real spectrum*, Ann. Scuola Norm. Sup. Pisa **4** (2002), 925–955. (with Bo Berndtsson)
Number of citations: 6

[33] *The essential spectrum for analytic Toeplitz operators on Hardy spaces*, Studia Math. **154** (2003), 223–231. (with Sebastian Sandberg)
Number of citations: 0??

[34] *Residue currents and ideals of holomorphic functions*, Bull. Sci. math. **128** (2004), 481–512.
Number of citations: 59

[35] *Ideals of smooth functions and residue currents*, J. Funct. Analysis **212** (2004), 76–88.
Number of citations: 7

[36] *Functional calculus for non-commuting operators with real spectra via an iterated Cauchy formula*, J. Funct. Analysis **210** (2004), 341–375. (with Johannes Sjöstrand)
Number of citations: 9

[37] *The membership problem for polynomial ideals in terms of residue currents*, Ann. Inst. Fourier **56** (2006), 101–119.
Number of citations: 16

[38] *Residues of holomorphic sections and Lelong currents*, Arkiv för mat. **43** (2005), 201–219.
Number of citations: 12

[39] *Residue currents of holomorphic morphisms*, J. reine angew. Math. **596** (2006), 215–234.
Number of citations: 6

[40] *Explicit versions of the Briançon-Skoda theorem with variations*, Michigan Math. J. **54** (2006), 361–373.
Number of citations: 11

[41] *Operators with smooth functional calculi*, J. of Operator Th. **98** (2006), 221–247. (with Håkan Samuelsson & Sebastian Sandberg)
Number of citations: 0??

[42] *Integral representation with weights II, division and interpolation*, Math. Z. **254** (2006), 315–332.
Number of citations: 17

[43] *A generalized Poincaré–Lelong formula*, Math Scand **101** (2007), 195–218.
Number of citations: 5

[44] *Residue currents with prescribed annihilator ideals*, Ann Sci L'Ecole Norm Sup **40** (2007), 985–1007. (with Elizabeth Wulcan)
Number of citations: 33

[45] *Uniqueness and factorization of Coleff-Herrera currents*, Annales Fac. Sci. Toulouse **18** (2009), 651–661.
Number of citations: 11

[46] *Decomposition of residue currents*, J. reine angew. Math. **638** (2010), 103–118. (with Elizabeth Wulcan)
Number of citations: 32

[47] *A residue criterion for strong holomorphicity*, Arkiv mat **48** (2010), 1–15.
Number of citations: 12

[48] *An explicit Koppelman formula for dd^c and Green currents on $\mathbb{P}^n$*, Math Z **267** (2011), 835–850.
Number of citations: ???

[49] *Explicit representation of membership of polynomial ideals*, Math Ann **349** (2011), 345–365. (with Elin Götmark)
Number of citations: 14

[50] *On the Briançon-Skoda theorem on a singular variety*, Ann. Inst. Fourier **60** (2010), 417–432. (with Håkan Samuelsson & Jacob Sznajdman)
Number of citations: 14

[51] *Coleff-Herrera currents, duality, and Noetherian operators*, Bull Soc France **139** (2011), 535–554.
Number of citations: 8

[52] *Weighted Koppelman formulas and the $\bar{\partial}$-equation on an analytic space*, Journal func. analysis **261** (2011), 777–802. (with H Samuelsson)
Number of citations: 14

[53] *Variants of the effective Nullstellensatz and residue calculus*, In Notions of Positivity and Geometry of Polynomials, Trends in Mathematics, Springer (2011), 17-31. (with E Wulcan)
Number of citations: 0

[54] *Segre numbers, a generalized King formula, and local intersection numbers*, arXiv:1009.2458 (), . (with H Samuelsson & E Wulcan & A Yger)
Number of citations: 1

[55] *On the effective membership problem for polynomial ideals*, ArXiv:1211.5096 (), . with E Wulcan
Number of citations: 0

[56] *A Dolbeault-Grothendieck lemma on complex spaces via Koppelman formulas*, Inventiones math. **190** (2012), 261–297. with H Samuelsson
Number of citations: 10

[57] *Green functions, Segre numbers, and King's formula*, Ann. Inst. Fourier (to appear) (), . with E Wulcan
Number of citations:

[58] *Global effective versions of the Briançon-Skoda-Huneke theorem*, Inventiones math (to appear) (), . (with E Wulcan)
Number of citations: 2

Books and compendiums

Lecture notes on division problems in $\mathbb{C}^n$. Universitat Autonoma Barcelona, (1994) (with Joaquim Ortega-Cerdà)

Topics in Complex Analysis, Universitext, Springer-Verlag, New York (1996).
Number of citations: 34

Logik, mängder, tal och geometri, kompendium Göteborg (1999).

Complex convexity and analytic functionals Progress in Math., Birkhäuser, (2004) (with Mikael Passare & Ragnar Sigurdsson)
Number of citations: 58

Other publications

Nya former för matematikstudier Nämnaren 2000:4

Chokladkakeproblemet igen igen Nämnaren 2001:1

En matematikers syn på lärande i förskola och skola Report on a conference "Matematik från början" April 2002, in revised form as an article in Nämnaren 2002.
Universitetskrav: Dags att lära lärare matematik GP debatt, 2005-02-28 with Torsten Ekedahl, Bo Johansson, Mikael Passare
